

# CIRKUM

Design by Troels Grum-Schwensen

The aim of the stackable CIRKUM chair has been to create a piece of furniture that combines comfort, variety and architectural harmony in a simple, distinctive shape. The geometrical key that makes all these elements come together is the semi-circle. In the version with arms, the back and the arms together form a clear, perceptible semi-circle that envelops the user in a friendly, warm and generous embrace, an alluring and welcoming sight... Hence the chair's name - CIRKUM means "around" or "about".

- Excellent seat comfort
- Durable and versatile
- Can stack up to 8 high
- Chair suspension possible
- Chairs can easily be linked in rows
- Armchair can be hung on table top
- Weight: approx. 5 kg
